SUPREME HYDROFUSE®

ENVIRONMENTALLY FRIENDLY SOLUTION

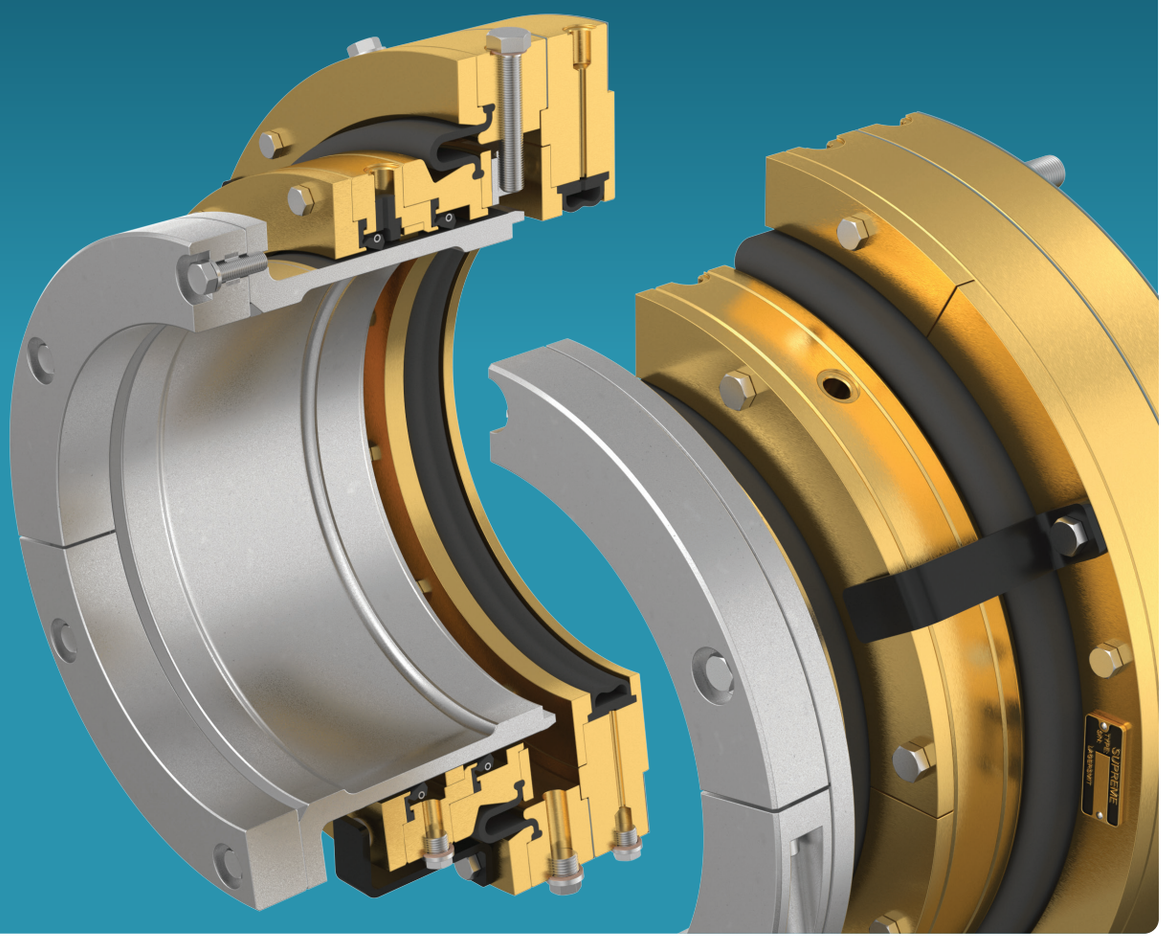

The Supreme Hydrofuse seal is especially developed to prevent water leakage from your open waterlubricated stern tube into your engine room. Due to the floating seal mechanism, it automatically adapts to the shaft's radial play if the bearings wear down.

VGP COMPLIANT

CONDITION MONITORING

LARGE RADIAL PLAY

WATER-LUBRICATED

ADVANTAGES

- It automatically adapts to the shaft's radial play if the bearings wear down
- The seals can handle a radial play up to 5 mm
- This is an environmentally friendly solution in line with VGP/VIDA regulations
- Extra safety through incorporated inflatable seal
- It allows for in situ maintenance
- Water flush connection: no seawater inside

MATERIALS

- NBR lip seals with Hastelloy® springs
- Bronze housing parts
- Stainless steel liner
- Cast iron clamping ring
- Stainless steel Water tank
- Wear Resistant HML liner coating

Type approvals from the major classification societies are available upon request.
